This would normally be my dedications. Like... I dedicate this to the idiot that took 80 files to make this template that should be fewer than 200 lines of code.

## ACKNOWLEDGEMENTS

These would be all the acknowledgements. I acknowledge that people did this already, but it was so bad that I have to do it again.

## LIST OF FIGURES

## LIST OF FIGURES

## ABBREVIATIONS

Apparently people have a whole bunch of abbreviations, and those need to be listed somewhere special instead of just introduced into the master list. It might be better to simply have this be a reference built list, using the `\label` command.

## ABSTRACT

This is the “academic abstract”. I’m not sure why the `\begin{abstract}` and `\end{abstract}` can’t be used... but here we are.

## CHAPTER ONE, THE CHAPTERING!

This is the first chapter. There would normally be a bunch of intro stuff here that nobody would read.... if this were a real thing.

- Testing
- Some
- Spacing

CHAPTER TWO, THE RETURN OF THE CHAPTER.

This is the second chapter. There would normally be a bunch of stuff here if this were a real thing.

$R = 4x^2$

$= 15x \quad (2.1)$

$R = 4x^2$

how it	works	and to
demonstrate	how to	enter info.

## APPENDIX

This file should be all the appendix info, probably autogenerated at some point, but for now we'll let it be external.

## REFERENCES

These are my References... probably actually made via bibtex, but we'll get there.
